

	Half term 1	Half term 2	Half term 3	Half term 4	Half term 5	Half term 6
Key focus	Why do we get different types of weather and climate?	How do people interact with different ecosystems?	How is geography linked to crime?	What is a global city?	Why do people move to global cities?	How can fieldwork help us to find things out about our environment?
Key knowledge and skills	Types of rainfall Interpreting data High and low pressure Atmospheric circulation	Sand dunes Rainforests Understanding transects	Use of Geographical Information Systems (GIS) Map skills	Push and pull factors Migration Understanding choropleth maps	Social, economic and environmental push and pull factors. Understanding population pyramids	Testing a hypothesis (question/theory) Collecting data Analysing data
Key words/ vocabulary	Relief Frontal Convictional Precipitation	Producer Primary consumer Secondary consumer Tertiary consumer	Crime GIS Social Economic Environmental	Infrastructure Sustainability	Social Economic Environmental	Hypothesis Method Data Analysis Evaluation
Assessment method	Assessment Point 1	Assessment Point 1	Assessment Point 1	Assessment Point 2	Assessment Point 2	Assessment Point 2
Wider links	Biomes	Ecosystems under threat	Global Crime	Globalisation	Development	Sustainability
Enrichment opportunities	Complete a weather study/diary	Complete a study on a small scale ecosystem such as a pond	Examine crime in our local area using crimemapper.co.uk	Visit Leeds as a global city, including Leeds Bradford Airport.		
Careers links	Meteorologist	Ecologist	Police Officer	Sustainability consultant	Urban Planner	Environment Agency consultant
